### BIOGRAPHY

Dr. Elie Khoury is an experienced orthopaedic surgeon, specializing in knee surgery. He is a respected Fellow of the Australian Orthopaedic Association and the Royal Australian College of Surgeons. With a strong academic background, Dr. Khoury serves as a Conjoint Senior Lecturer at UNSW. He holds various accreditations, including being an ASSET Course Instructor and a First and Second Line Assessor for VASM. Dr. Khoury's expertise extends to arthroplasty and he actively contributes to research in the field. His research papers cover a wide range of topics, such as CT Densitometry Study of Acetabular Stress Shielding in THR and Prospective Medium Term Outcome of a Short Stem THR. Driven by a

passion for delivering high-quality care, Dr. Khoury currently holds positions as an orthopaedic surgeon at Albury Base Hospital, Albury-Wodonga Private Hospital, and Northpark Private Hospital. His dedication to advancing the field of orthopaedics and his commitment to patient well-being make him a valuable asset to the medical community.
